## PERSONAL STATEMENT

I am a technically driven leader focused on leveraging AI to solve complex problems quickly. I combine deep technical expertise with clear communication skills to align teams, eliminate blockers, and deliver results under ambitious timelines. Over the past year, I have balanced my full-time role with serving as Founding Engineer at OneDeal, where I helped build out an agentic business search engine. I'm eager to partner with smart, risk-tolerant builders who value speed and innovation, and I am ready to contribute by turning bold ideas into scalable outcomes.

## PROFESSIONAL EXPERIENCE

### Founding Engineer

10/2024 – Present

*OneDeal*

- Designed and implemented agentic "scouts" which are able to source private, not-for-sale businesses fitting specific search parameters using TypeScript, Amazon Bedrock, Bright Data, and DynamoDB, and orchestrated with ECS
- Built a website used by private equity firms and other investors to research and acquire small/medium sized domestic businesses using React.js, TypeScript, and DynamoDB

### Software Engineer II

04/2024 – Present | Centennial, CO

*Alarm.com*

- Led the Stripe Customer-Managed Subscriptions project engineering team's effort, in addition to resource planning, spec reshaping, design, implementation, and internal stakeholder/3rd party vendor communication.
- Ideated and built a self-validating ChatGPT-powered tool that refactors legacy database layer code and autonomously generates sanity tests to verify and iterate on its output—boosting productivity by ~8x during maintenance cycles (based on tracked ticket throughput).
- Filed a provisional patent in a core business area and submitted others.

### Software Engineer

08/2021 – 04/2024 | Centennial, CO

*Alarm.com*

- Ideated and shipped side projects including internal tools, Chrome extensions, a Login-with-Two-Factor microservice, and gamification features

### Software Engineer Intern

06/2020 – 08/2020 | Centennial, CO

*Alarm.com*

- Architected a dynamic and auto-translated email sent to hundreds of thousands of users per year

### Software Engineer Intern

05/2019 – 08/2019 | Olathe, KS

*Garmin*

- Created 80+ tests in C for the GI 275 Attitude Indicator following FAA standards

## Languages, Frameworks, Tools

**Javascript & TypeScript** — Node, React, Ember

**C#** — API, Lambda

**HTML, CSS** — SASS, Tailwind, Shadcn

**Database** — SQL, NoSQL

**API** — Integration, Design, Scale

**Cloud** — Azure, AWS, Google Cloud, Supabase

**Atlassian Suite** — Jira, Confluence, Bitbucket, Bamboo

**Tools** — Cursor, Azure OpenAi, Amazon Bedrock, BrightData

## Soft Skills

**People Skills** — Emotional Intelligence, Cross-Team Collaboration, Written and Verbal Communication, Knowledge Sharing, Mentorship, Leadership

**Intrapersonal Skills** — Organization, Accountability, Integrity, Growth-oriented Mindset

**Product Skills** — AI Integrations, Ideation, Time Estimation

## EDUCATION

**B.S in Computer Science, Minor in Mathematics**

05/2021 | Coral Gables, FL

*University of Miami*

GPA 3.96
